

AVIATION UAVS/ DRONES

An unmanned aerial vehicle (UAV) is an aircraft that carries no human pilot or passengers. UAVs (also called drones) can be fully or partially autonomous but are more often controlled remotely by a human pilot. Our aviation team is well versed in “drone insurance” and all of the various coverages that may be necessary for the specific needs of operators and non-owner end-users of unmanned aircraft.

COMPANIES

- AIG
- Global Aerospace
- Great American
- Old Republic Aerospace
- Starr Aviation
- USAIG

CLASSES

- Agriculture
- Commercial Photographers
